TASK 3
CHALLENGES & SURVEYS

Check Tutorial tab to know how to to solve.

Task

The provided code stub reads an integer, n, from STDIN. For all non-negative integers $i < n$, print i^2.

Example

$n = 3$

The list of non-negative integers that are less than $n = 3$ is $[0, 1, 2]$.

Print the square of each number on a separate line.

```
0
1
4
```

Input Format

The first and only line contains the integer, n.

Constraints

$1 \leq n \leq 20$

Output Format

Print n lines, one corresponding to each i.

Sample Input 0

Change Theme Language Pypy 3

```python
if __name__ == '__main__':
    n = int(input())

    # We use a for loop to go from 0 up to (but not including) n
    for i in range(n):
        # We print the square of i
        print(i**2)
```

Line: 7 Col: 20
